Serial No. 09/483,170 Filed: 1/14/00

obtaining the resource data from a source of system resources and storing a shared copy of the resource data to be utilized by the two or more applications;

receiving one or more resource data requests from the applications;

processing the resource data requests by accessing and utilizing the shared copy of the resource data; and

communicating the processed resource data to the respective applications.

18. (Amended) A method for sharing graphics device interface (GDI)/font resource data between multiple instances of single document interface (SDI) applications, said method comprising:

2 5 bb 7 B2

obtaining a copy of the GDI/font resource data to be shared with at least two of the SDI applications;

receiving font data process requests from the SDI applications;

processing the font data requests using the shared copy of the GDI/font resource data; and

communicating the processed font data to the SDI applications.

33. (Amended) A cross-process resource sharing system, said system

comprising:

Sub 7

a central data server for acquiring and processing requested resource data;

a central data store containing shared resource data, wherein said central data server establishes a communications link between said central data store and a client application;
